- Acclimation proteins, *Pseudomonas fluorescens* produced by, 179
- Acetogenic bacteria, from digestive tract of different mammals, quantitative determination of, 129
- Acetoin, *Bacillus polymyxa* fermentation of xylans, corn fiber, and sugars to, 291
- Acinetobacter* strains, oleyl oleate and wax esters synthesized from oleic acid by, 336
- Acyl proteins, in plasma membrane of *Mycoplasma mycoides* subsp. *mycoides* SC, 38
- Aeromonas* spp., production of Shiga-like toxin 1 by, 239
- Agaricus bisporus*, expression of intracellular enzymes during hyphal aggregate formation in fruiting-impaired variant of, 252
- Alternan hydrolytic activity, isolation and characterization of microorganisms with, 343
- Anacystis nidulans*, differential regulation of nitrogen metabolism in wild type and high-light-tolerant mutant cells of, 272
- Antibacterial activity, of *Enterobacter agglomerans*, 208
- Antifungal activity, of *Enterobacter agglomerans*, 208
- Aphid endosymbiont, characterization and detection of ribosomal protein S1 (RpsA) of, 89
- Artificial neural networks, identification and discrimination of oral asaccharolytic *Eubacterium* spp. by, 77
- Aspergillus fumigatus*, cellulase production by, 119
- Bacillus anthracis*, isolation of  $\phi 20$  temperate bacteriophage existing as plasmid prophage from, 171
- Bacillus megaterium*, induction of cytochrome P450<sub>BM-3</sub> by, 124
- Bacillus polymyxa* strains, fermentation of xylan, corn fiber, and sugars to acetoin and butanediol by, 291
- Bacillus pumilus*, bioconversion of oleic acid by, 160
- Bacillus thuringiensis*, effect of eicosanoid biosynthesis inhibitors on response of cultured insect cells and developing larvae to  $\delta$ -endotoxin from, 1
- Bacillus thuringiensis kurstaki* INA-02, insecticidal activity of protein encoded by *cryV* gene of, 195
- Bacillus thuringiensis* strains, characterization of mosquitocidal and hemolytic activities of, 48
- $\beta$ -galactosidase activity, of *Streptococcus thermophilus* measured by permeabilization of bile salts, 101
- $\beta$ -glucosidase, separated from *Aspergillus fumigatus*, characterization of, 119
- $\beta$ -lactamase, produced by *Pseudomonas syringae* as protection from tabtoxin, 147
- Bifidobacterium bifidum* DSM 20082, lactose transport system in, 301
- Bordetella pertussis*, promotion of bacteriophage induction and recombination by cloned *recA* gene of, 162
- Buchnera aphidicola* chaperonin GroEL, levels of, during growth of *Schizaphis graminum*, 279
- Buchnera aphidicola*, characterization and detection of ribosomal protein S1 (RpsA) of, 89
- Butanediol, *Bacillus polymyxa* fermentation of xylans, corn fiber, and sugars to, 291
- Ca<sup>2+</sup>, uptake and regulation in *Nostoc* MAC, 332
- Caecomyces communis*, glycoside and polysaccharide hydrolase activity at early and final stages of development cycle of, 256
- Calorimetry, metabolic differences between *Geomyces pannorum* strains measured by, 7
- Carbonate precipitation, by *Deleya halophila*, SEM and x-ray dispersive energy microanalysis of, 308
- Cell wall structure, of *Cladosporium carrionii* and *Hormoconis resinae*, 11
- Cellulase, *Aspergillus fumigatus* production of, 119
- Chemotaxis, to maltose and sucrose, genetic analysis of *Chlamydomonas reinhardtii* mutants defective in, 357
- Chitinase activity, of enzymes of ruminal protozoa and *Entodinium caudatum*, 115
- Chlamydomonas reinhardtii*, isolation and characterization of chemotaxis mutants of, 357
- Chlorobium limicola*, role in recovery of sulfur from thiosulfate-bearing wastewater, 33
- Chlorobium vibrioforme* f. *thiosulfatophilum*, role in recovery of sulfur from thiosulfate-bearing wastewater, 33
- Cladosporium carrionii*, cell wall and melanin studies of, 11
- Clostridium acetobutylicum* ATCC 824, recombination-induced variants of, 349
- Coagulase-negative staphylococci, binding of heparin-binding host growth factors by, 201
- Cold shock proteins, in *Pseudomonas fluorescens*, 179
- Comamonas* sp. strain SGLY2, effect oxygen on denitrifying enzymatic system of, 25
- Copper ions, effect on plasmid copy number in *Thiobacillus ferrooxidans*, 57
- Copper nitrite reductase, from *Haloferax denitrificans*, purification and properties of, 72
- Corynebacterium ammoniagenes*, ability to synthesize 2-C-methyl-D-erythritol-2,4-cyclopyrophosphate genetically transferred to *E. coli* from, 225
- Coryneform strains, oleyl oleate and wax esters synthesized from oleic acid by, 336
- CryV* gene, from *Bacillus thuringiensis kurstaki* INA-02, insecticidal activity of protein encoded by, 195
- Cytochrome P450<sub>BM-3</sub>, induced in *Bacillus megaterium* by long-chain fatty acids and sodium dodecyl sulfate, 124
- Dairy propionibacteria strains, PFGE used for DNA fingerprinting of, 17
- Dam methylation, in *Legionellae*, 64
- Deleya halophila*, carbonate precipitation by, 308
- $\delta$ -endotoxin, from *Bacillus thuringiensis*, effect of eicosanoid biosynthesis inhibitors on cultured insect cells and developing larvae response to, 1
- Desulfovibrio desulfuricans*, role in recovery of sulfur from thiosulfate-bearing wastewater, 33
- Eicosanoid biosynthesis inhibitors, effect on *Bacillus thuringiensis*  $\delta$ -endotoxin response in cultured insect cells and developing larvae, 1
- Enterobacter agglomerans*, pyrrolnitrin production by, 208
- Enterococcus faecalis*, crude extractives of *Mansonella altissima* sawdust inhibit growth of, 297
- Enterococcus faecalis* JH2-2, starvation-induced multiresistance in, 264
- Enterococcus seriolida*, as synonym of *Lactococcus garvieae*, 85
- Entodinium caudatum*, electrophoretic forms of chitinolytic and lysozyme activities in, 115
- Environmental stress, role in starvation-induced multiresistance in *Enterococcus faecalis* JH2-2, 264
- Escherichia coli* 2-31 strain, correlation of tolerance to oxidative stress and bacterial action of murine peritoneal macro-

- phages with synthesis of 2-C-methyl-D-erythritol-2,4-cyclopyrophosphate by, 225
- Escherichia coli* strains, effect of peracetic acid disinfectant on plasmid contents of, 43
- Ethylene glycol, utilization by and shock proteins in *Pseudomonas fluorescens*, 179
- Eubacterium* spp., identified by pyrolysis mass spectrometry and artificial neural networks, 77
- Fibroblast growth factors, *Staphylococcus aureus* and coagulase-negative staphylococci binding of, 201
- Fusarium oxysporum* f. sp. *lycopersici*, enzymatic activities of *Trametes versicolor* and *Pleurotus eryngii* implicated in biocontrol of, 151
- Geomyces pannorum*, metabolic differences between two Antarctic strains of, 7
- Glucose 6-phosphate dehydrogenase (G6PD), concentration and activity during aggregate formation in fruiting-impaired *Agaricus bisporus* variant strain, 252
- Glutamine synthetase activity, in wild type and high-light-tolerant *Anacystis nidulans* mutant, effect of light intensity on differential response of, 272
- Glycoside hydrolase activity, of *Caecomyces communis* at early and final stages of development, 256
- Haloanaerobiales*, isolation and characterization of new genus and new species of, 320
- Haloferax denitrificans*, purification and properties of copper nitrite reductase from, 72
- Heparin-binding growth factors, *Staphylococcus aureus* and coagulase-negative staphylococci binding of, 201
- Herbivorous mammals, comparison of number of methanogenic archaea and sulfate-reducing and acetogenic bacteria from digestive tract of, 129
- Histonelike protein, identified in *Streptococcus gordonii*, 95
- Hormoconis resinae*, cell wall and melanin studies of, 11
- Hydrogel contact lens, effect of *Staphylococcus epidermidis* on retention of, 176
- Indoleacetic acid, role in plant growth stimulation by *Pseudomonas putida* GR12-2 mutants, 67
- 10-Ketostearic acid, *Staphylococcus warneri* species converts oleic acid to, 260
- Lactobacillus leichmannii*, molecular characterization of *xerC* gene of, 232
- Lactobacillus pentosus*, numerical analysis of random amplified polymorphic DNA (RAPD)—PCR as method to differentiate between *L. plantarum*, 183
- Lactobacillus plantarum*, numerical analysis of random amplified polymorphic DNA (RAPD)—PCR as method to differentiate between *L. pentosus* and, 183
- Lactococcus garvieae*, *Enterococcus seriolicida* as synonym of, 85
- Legionellae*, dam-like methylation in, 64
- LiCl, extraction of DNA nicking and binding activities from *Streptococcus gordonii* surface using, 95
- Long-chain fatty acids, role in induction of cytochrome P450<sub>BM-3</sub> in *Bacillus megaterium*, 124
- Lysozyme activity, of enzymes of ruminal protozoa and *Entodinium caudatum*, 115
- Magnaporthe poae*, biocontrol of summer patch disease in Kentucky bluegrass caused by, 106
- Mansonia altissima* sawdust, growth inhibition of *Pseudomonas aeruginosa* and *Enterococcus faecalis* by extracts of, 297
- Melanin, localized in *Cladosporium carrionii* and *Hormoconis resinae*, 11
- Meningoencephalitis, in fish, *Enterococcus seriolicida* and *Lactococcus garvieae* as causative agents for, 85
- Methanogenic archaea, from digestive tract of different mammals, quantitative determination of, 129
- 2-C-Methyl-D-erythritol-2,4-cyclopyrophosphate, *E. coli* strain synthesis of, 225
- Mitomycin C, role of *Bordetella pertussis* *recA* gene in bacteriophage induction and recombination in presence of, 162
- Mosquitocidal activity, of *Bacillus thuringiensis* strains, 48
- Mycoplasma mycoides* subsp. *mycoides* SC, selective acylation of plasma membrane proteins of, 38
- Natroniella acetigena* gen. nov. sp. nov., new member of *Haloanaerobiales*, 320
- Nitrate reductase
- purification from *Haloferax denitrificans*, 72
- role in denitrifying enzymatic system of *Comamonas* sp. strain SGYL2 under aerobic conditions, 25
- Nitrite reductase, role in denitrifying enzymatic system of *Comamonas* sp. strain SGYL2 under aerobic conditions, 25
- Nostoc* MAC, Ca<sup>2+</sup> uptake and regulation in, 332
- Oleic acid
- converted by *Staphylococcus warneri* species to 10-ketostearic acid, 260
- oleyl oleate and wax esters synthesized by *Acinetobacter* and coryneform strains into, 336
- Oleyle oleate, synthesized from oleic acid by *Acinetobacter* and coryneform strains, 336
- Organic acid utilization, by *Selenomonas ruminantium*, effect of extracellular H<sub>2</sub> on, 327
- Pediococcus pentosaceus* NCDO990, plasmid-linked metabolic traits shown in, 188
- Pediococcus* strains, plasmid transfer by electroporation and conjugation in, 188
- Penaes monodon*, virulence of *Vibrio alginolyticus* isolated from, 229
- Penicillium roqueforti*, PR toxin degrades to PR-acid in culture of, 141
- Peracetic acid disinfectant, effect on plasmid contents of *E. coli* strains from water-treatment plant, 43
- Plant growth stimulation, role in indoleacetic acid in, 67
- Plasmid contents, of *E. coli* strains, effect of peracetic acid disinfectant on, 43
- Plasmid copy number, of *Thiobacillus ferrooxidans*, effect of metal ions on, 57
- Plasmid transfer
- by electroporation and conjugation in *Tetragenococcus* and *Pediococcus* genera, 188
- in soil microcosms, effect environmental factors on, 213
- Plasmidial prophage, temperate bacteriophage isolated from *Bacillus anthracis* existing as, 171
- Platelet-derived growth factors, *Staphylococcus aureus* and coagulase-negative staphylococci binding of, 201
- Pleurotus eryngii*, role of enzymatic activities in biocontrol of *Fusarium oxysporum* f. sp. *lycopersici*, 151
- Polysaccharide hydrolase activity, of *Caecomyces communis* at early and final stages of development, 256
- PR toxin, degrades to PR acid in *Penicillium roqueforti* culture, 141
- Protein synthesis, role in starvation-induced multiresistance in *Enterococcus faecalis* JH2-2, 264
- Pseudomonas aeruginosa*, crude extracts of *Mansonia altissima* sawdust inhibit growth of, 297
- Pseudomonas fluorescens*, ethylene glycol utilization by, 179
- Pseudomonas putida* GR12-2 mutants, indoleacetic acid overproduced by, 67
- Pseudomonas syringae*, properties of  $\beta$ -lactamase from, 147
- Pulsed-field gel electrophoresis, DNA fingerprinting of dairy propionibacteria strains by, 17
- Pyrolysis mass spectrometry, identification and discrimination of oral asaccharolytic *Eubacterium* spp. by, 77
- Pyrolysis, *Enterobacter agglomerans* production of, 208

- Random amplified polymorphic DNA (RAPD)—PCR, *Lactobacillus plantarum* and *Lactobacillus pentosus* differentiated by numerical analysis of, 183
- recA* gene, of *Bordetella pertussis*, copy number-dependent promotion of bacteriophage induction and recombination by, 162
- Receptor-nickase, identified in *Streptococcus gordonii*, 95
- Restriction endonuclease patterns, dairy propionibacteria strains compared using, 17
- Rhizopus stolonifer*, influence of metal ions in extracellular ribonuclease production by, 246
- Ribonuclease, influence of metal ions in *Rhizopus stolonifer* production of, 246
- Ruminal protozoa, electrophoretic forms of chitinolytic and lysozyme activities in, 115
- Scanning electron microscopy, of carbonate precipitation process in *Deleya halophila*, 308
- Schizaphis graminum*, levels of *Buchnera aphidicola* chaperonin GroEL during growth of, 279
- Selenomonas ruminantium*, effect of extracellular hydrogen on organic acid utilization by, 327
- Septicemia, in fish, *Enterococcus seriolicida* and *Lactococcus garvieae* as causative agents for, 85
- Shiga-like toxin 1, *Aeromonas* spp. isolates produce toxin similar to, 239
- Sodium dodecyl sulfate, role in induction of cytochrome P450<sub>BM-3</sub> in *Bacillus megaterium*, 124
- Spiroplasma citri*, characterization of viral sequences of SpV1-R8A2B present in chromosome of, 134
- Spiroplasma* strains, temperature ranges, growth optima, and growth rates of, 314
- Spodoptera litura*, activity of *cryV* protein from *Bacillus thuringiensis kurstaki* INA-02 against, 195
- Sporulation-specific genes, from *Clostridium acetobutylicum* ATCC 824, role in solvent production, 349
- Staphylococcus aureus*
- binding of heparin-binding host growth factors by, 201
- phage-mediated transfer of chromosomally integrated tetracycline resistance plasmid in, 286
- Staphylococcus epidermidis*, effect on hydrogel contact lens retention on rabbit eye, 176
- Staphylococcus warneri* species, conversion of oleic acid to 10-ketostearic acid by, 260
- Streptococcus bovis*, inducer expulsion is not determinant of diauxic growth in, 221
- Streptococcus gordonii*, DNA nicking and binding activities in, 95
- Streptococcus mutans*, characterization of fluoride-resistant isolate of, 156
- Streptococcus thermophilus*, permeabilization used to measure  $\beta$ -galactosidase activity of, 101
- Sulfate-reducing bacteria, from digestive tract of different mammals, quantitative determination of, 129
- Summer patch disease, method for selecting bacterial antagonists for control of, 106
- Tabtoxin, *Pseudomonas syringae* production of  $\beta$ -lactamase as protection from, 147
- Tetracycline resistance plasmid, phage-mediated transfer of, in *Staphylococcus aureus*, 286
- Tetragenococcus* strains, pVA797 plasmid transfer by conjugation in, 188
- Thiobacillus ferrooxidans*, differential influence of ions on copy number of plasmids in, 57
- Thiosulfate-bearing wastewater, phototrophic and sulfur-reducing bacteria recover sulfur from, 33
- Trametes versicolor*, role of enzymatic activities in biocontrol of *Fusarium oxysporum* f. sp. *lycopersici*, 151
- Vibrio alginolyticus*, from diseased tiger prawns, isolation, characterization, and virulence of, 229
- Viral sequences, of *Spiroplasma citri* virus SpV1 present in spiroplasma host chromosome, 134
- Wax esters, synthesized from oleic acid by *Acinetobacter* and coryneform strains, 336
- X-ray dispersive energy microanalysis, of carbonate precipitation process in *Deleya halophila*, 308
- xerC* gene, of *Lactobacillus leichmannii*, molecular characterization of, 232
- Xylans, fermentation by *Bacillus polymyxa* strains to acetoin and butanediol, 291
